- ❖ Dean's List, Spring 2023
- ❖ Affiliations: Association for Computing Machinery, Google Developer Student Club, Pilipino American Coalition
- ❖ BeachHacks Sponsorship Committee Member, Spring 2023

COURSEWORK

CSULB

Computer Science Senior Project | Analysis of Algorithms | Operating Systems | Concepts of Computer Science Theory | Database Fundamentals | Object Oriented Application Development

PROJECTS

Aim Trainer (React, Express, PostgreSQL, Render, Google Firebase)

- Developing a full-stack application where users can log in to practice their aim by shooting targets
- Designed and developed the CI/CD workflow for both the backend and frontend applications with Github actions and Render
- Implemented user authentication flow with Google firebase
- Applying TDD principles within the application through jest and react-testing-library to maximize app stability and code quality

Apartment Manager (React, Django, PostgreSQL)

- Designed and developed a full-stack application to help a landlord organize payments for their tenants
- Designed database relationships between Landlord, Tenant, Expense Records, Rental Income Records, and Annual Summary

Nilly's Burger Shop Website (React, Typescript, Google Maps API, Netlify)

- Contributed to the development of the website for Nilly's Burger Shop using Typescript, React, Google Maps API, and deployed to Netlify (nillysburgershop.com)
- Led the development for the menu and contact page as well as the footer content

EXPERIENCE

Nilly's Burger Shop (Artesia, CA)

JAN 2022 - PRESENT

Helped start up the business and currently working as a cashier, cook, and web developer for the website. Excelling in delivering premium customer service and food.
